WORK EXPERIENCE

2020-2021
Proximedia

SALES REPRESENTATIVE

- Actively attracted new customers by identifying business needs and presenting Proximedia's website creation and support services.
- Built and maintained strong relationships with existing customers, ensuring their ongoing satisfaction and fostering long-term business partnerships.
- Promoted and sold various products and services, including website development and customer support packages.
- Worked closely with the IT team to ensure customer needs were communicated effectively and that final deliverables aligned with expectations.

2015-2019
Wit-Gele Kruis

LOGISTICS EMPLOYEE

- Delivered beds, hoists, wheelchairs, and other medical equipment to patients, ensuring timely and accurate distribution.
- Installed, repaired, and tested the Personal Alarm System (PAS) in patients' homes, receiving specialized training to handle technical tasks.
- Managed the logistical distribution of materials to various departments.
- Ensured cleanliness of incoming materials, maintaining high standards of hygiene and safety.
- Worked closely with colleagues to maintain a well-organized warehouse, optimizing storage and retrieval of medical equipment.

SOFT SKILLS

- Clear communication
- Experience working in multi-disciplinary and multicultural teams
- Problem-solving and critical thinking
- Adaptability and learning agility
- Attention to detail
- Time management
- Proactive mindset

PERSONAL PROJECTS

DATING APP

https://devdate.fly.dev

Technologies: ASP.NET Core · Angular · TypeScript · Bootstrap · Docker · PostgreSQL

Project Overview:

- Designed and built a scalable, responsive web application from scratch to showcase end-to-end development skills.
- Implemented a secure RESTful API using ASP.NET Core for user auth and profile management.
- Developed a dynamic frontend with Angular and TypeScript, styled with Bootstrap.
- Containerized the app using Docker and deployed it via Fly.io.
- Leveraged PostgreSQL for relational data and match filtering.
- Applied DevOps practices by implementing a CI/CD pipeline using GitHub Actions.

BROUX VERWARMING & SANITAIR

https://broux-verwarming-sanitair.be

Technologies: React · Node.js

Project Overview:

- Built a dynamic, full-stack website for a Belgian heating and sanitation company using React (frontend) and Node.js (backend).
- Implemented a contact form and service request feature to support customer interaction.
- Delivered a mobile-first, brand-aligned design optimized for usability across devices.
- Applied SEO best practices to boost visibility and lead generation.
- Worked closely with the client to translate their brand identity into a functional, scalable digital platform.
